They got 13, 16, and 30 and they no longer use 29 and they are begging off on benzene. I guess an issue is are they using something else in place of 29.

Mrs. Tschirhart,

I will arrange to have samples of Blendstocks 16, 13, and 30 sent to you. They should arrive in Ann Arbor early next week. We no longer use Blendstock 29. Blendstock 3 is simply pure benzene and is used more like an additive in very small amounts. We don't keep any on hand here and it is adjusted in the tank by our contract blender. Please let me know if I can be of further assistance.
